

18 Years of  
NASA Studies Prove

# INDOOR PLANTS ARE CLEAN AIR MACHINES

Plants remove noxious gases from indoor air, convert it into pure, fresh healthy air. Nearly 2 decades of NASA testing has proved it.

Some of the most effective air cleaners are these common indoor plants:

- Chinese Evergreen
- Gerbera Daisy
- Golden Pothos
- Janet Craig
- Marginata
- Peace Lily
- Chrysanthemum
- Warneckii

Want to know how to improve the quality of the air in your building with plants? Call us for a no-cost or obligation recommendation.
